David Philip Larson

Contact Information

Ph.D. Student
Mechanical and Aerospace Engineering
University of California, San Diego
9500 Gilman Drive
La Jolla, CA 92093-0411

dplarson@ucsd.edu

Research Interests

Solar Forecasting, Non–Integer Order Methods, Nonlinear Chaos, Machine Learning

Education

University of California, San Diego
Ph.D. in Mechanical Engineering 2012–present
- Advisor: Carlos F.M. Coimbra

University of California, Merced
B.S. in Mechanical Engineering 2008–2012
- Dean's Undergraduate Research Scholarship (2008–2009)
- Dean's Honor List (Fall 2008, Fall 2011)

Citizenship

U.S.

Research Experience

Lab Manager, Coimbra Group 2012–present
University of California, San Diego
- Automated detection of remote instrument failures
- Implemented centralized version control for all projects
- Coordinated installation of two solar observatories
- Manage group information infrastructure (computers, servers, databases)
- Oversee research lab safety (15+ personnel)

Graduate Student Researcher, Coimbra Group 2012–present
University of California, San Diego
- Developing forecasting methods for chaotic time series

Visiting UC LEADS Scholar, Animal Flight Lab Summer 2011
University of California, Berkeley
- Host Program: Cal NERDS
- Investigated effects of turbulent flow on hummingbird kinematics and metabolism
- Developed Particle Image Velocimetry (PIV) data analysis scripts for turbulent flow

UC LEADS Scholar, Coimbra Group Summer 2010
University of California, Merced
- Investigated aerodynamic trends of flapping flight

Lab Manager, Coimbra Group 2010–2012
University of California, Merced
- Deployed solar observatories in CA (Merced, Berkeley, Davis) and WA (Bellingham)
- Manage group information infrastructure (computers, servers, databases)
- Oversaw research lab safety (10+ personnel)

Undergraduate Student Researcher, Coimbra Group 2009–2012
University of California, Merced
- Deployed high-fidelity irradiance and weather sensor systems at sites across CA and WA state
- Tested long term degradation of anti-dust glass coating for solar panels
- Analyzed animal flight data to determine underlying aerodynamic trends

Undergraduate Student Researcher, Hirst Group 2008–2009
University of California, Merced
- Investiaged phase separation in lipid tubules

Lab Assistant, MEMS Lab 2007–2008
University of California, Santa Cruz
- Developed prototype printable RF-ID tag for tracking of dragonflies

Technical Skillsets

Software
- Languages: Python, Matlab, Mathematica, UNIX Shell
- Version Control: Git
- TeX: LaTeX, Bibtex
- CAD: Pro/ENGINEER, Autodesk Inventor

Rapid Prototyping
- Machining: mill, lathe, and drill press machining
- 3D printing

Instrumentation
- Irradiance and weather sensors
- PIV: high speed cameras, q-switched lasers, wind tunnels

Operating Systems
- OS X, Linux, Windows

Awards

Innovate to Grow Competition May 2012
- 1st Place (tied) People's Choice
- Entry Title: Harvesting Energy from Irrigation Canals
- Authors: D.P. Larson, D. Leong, S. Fleming, S. Isaiah

Distributed Power Generation Project 2011
- Sponsors: ESW, SunEdison/MEMC, Autodesk
- Entry Title: Solar Powered Cargo Ship
- Funding Amount: $8150

CITRIS Big Idea Competition Apr 2010
- Honorable Mention
- Entry Title: Distributed Computing for Open Access Solar Forecasting
- Authors: R. Marquez, D.P. Larson, H.T.C. Pedro
- Award Amount: $1000

ASME Old Guard Oral Presentation Competition Apr 2010
- 5th Place, District D
- Entry Title: Distributed Computing for Open Access Solar Forecasting

Professional Memberships	**American Society of Mechanical Engineers**	
	Student Member	2009–present
	Engineers for a Sustainable World	
	Student Member	2011–present
